

E-mail Virus and Spam Filtering

E-mail viruses and spam are two of the biggest hassles system administrators have to deal with on today's Internet. MOREnet's low-cost E-mail Virus and Spam Filtering service eliminates the majority of spam and all known viruses from an organization's e-mail. EVSF requires no end-user participation—no server, equipment or software reconfiguration, no time to administer, and no hardware investment on your part. Everything happens on MOREnet's backbone.

What is it?

The EVSF service is a software solution that runs completely on the MOREnet network infrastructure. All known e-mail viruses and most of the spam are filtered out before they reach an organization's mail server.

Why do I need it?

EVSF removes all known e-mail-borne viruses and removes most spam automatically, saving an organization's staff the time and frustration of sorting legitimate messages from spam and e-mail virus traffic, freeing up the network for legitimate use and reducing inappropriate use of computing and storage resources. It reduces security incidents from e-mail-borne virus infections, which helps reduce staff time spent cleaning mailboxes, disinfecting or reloading systems. EVSF requires no technical

oversight, meaning that it doesn't require any end-user activity or training, freeing staff for other duties.

How do I use it?

EVSF works on the MOREnet network infrastructure, and it doesn't require any member administration or technical resources.

Who can use it?

All MOREnet members that maintain their own e-mail servers are eligible to participate in EVSF. EVSF is included as part of the *kinetic* service.

How do I get it?

To apply, download the application form at www.more.net/services/evsf/evsf-orderform.pdf. Members can mail in the

completed form to MOREnet, 3212A LeMone Industrial Blvd., Columbia, MO, 65201, or fax it to (573) 884-6673. A purchase order must accompany the completed form.

How much does it cost?

1 - 999 e-mail addresses: **\$595**
1,000+ e-mail addresses: **\$1,095**

Pricing is valid through June 30, 2007. The service will be prorated by the month of entry for members that subscribe after the beginning of the fiscal year. Members will be billed annually for this service at the beginning of the fiscal year (July) unless notification is made to MOREnet at least 30 days before cancellation. No refunds are available for this service.
